PROFESSIONAL SUMMARY

- Having over **6** years of progressive experience as a **Senior Network Engineer**, specializing in **network design, implementation, and maintenance to support critical business operations.**
- Expertise in configuring and maintaining **LAN, WLAN, and WAN** environments, ensuring optimal performance and adherence to business policies.
- Proven track record in implementing **advanced security protocols, managing firewalls, VPNs, and email/web security** to safeguard against cyber threats and vulnerabilities.
- Skilled in **server maintenance, switch configurations, and network optimization**, with hands-on experience in automated backups and fail-over configurations.
- Outstanding troubleshooting skills to resolve complex issues, including **hardware malfunctions, software failures, and network performance bottlenecks.**
- Proficient in deploying MPLS, QoS, and other routing protocols, along with network engineering tools and technologies like **Ubiquiti Unifi, Aruba, RUCKUS, Grandstream, Cambium, Juniper,Cisco Meraki,Tp-link, and Zyxel**.
- Successfully **deployed and managed Wi-Fi setups** in over many properties, optimizing infrastructure for reliability and security.
- Adept at maintaining compliance with **ISMS policies, preparing security reports, and conducting breach investigations** to enhance organizational data protection.
- Demonstrated ability to **lead teams**, collaborate with network architects for optimization, and recommend technical improvements for enhanced operational efficiency.
- Holds **MIST Location and MIST Wi-Fi certifications**, showcasing expertise in advanced wireless solutions
- Fluent in **Kannada, English, Hindi, Marathi, and Telugu**, facilitating seamless communication in diverse environments.

PROFESSIONAL EXPERIENCE

- I have been associated with **Spherebox Infra Private Limited** from Feb 2024 to till date as Team Lead.
- Worked as Network Engineer with **Zolostays**, from Apr 2022 to Feb 2024.
- Worked as Network Engineer with **ACT Fibernet**, from Feb 2020 to Apr 2022.

TECHNICAL SKILLS

- **Networking Protocols:** MPLS, QoS, WAN, TCP/IP, GLBP, RTSP
- **Network Management:** LAN, WLAN, VPN, firewall configurations, and endpoint security
- **System Administration:** Server maintenance, Windows/Linux troubleshooting, and automated backups
- **Security:** Protocol implementation, intrusion prevention, and ISMS compliance
- **Tools & Technologies:** Ubiquiti Unifi, Cambium, Tplink, Zyxel, Cisco systems, IIS
- **Design & Optimization:** Network infrastructure design, configuration, and optimization
- **Troubleshooting:** Fiber splicing, hardware/software issues, and network escalations

Team Lead

EDUCATION

- **Bachelor's in Computer Applications (BCA)** *(Ongoing)*
  Karnataka State Open University

- **Diploma in Computer Science** (Completed: 2019)
  MEI Polytechnic

Spherebox Infra Private Limited

Team Lead March-2025 to present

Responsibilities:

- Leading and mentoring a team of 10+ on-site network engineers across PAN India.
- Managing and delivering network deployment projects across 40+ hotels, 6 educational institutes, 350+ cafes, and 3 technology parks.
- Planning, executing, and monitoring Wi-Fi deployment projects end-to-end, including AP placement, cabling, and switch/firewall configurations.
- Generating and analysing Wi-Fi heatmaps for coverage optimization and capacity planning.
- Coordinating with ISP vendors for link provisioning, upgrades, and issue resolution.
- Maintaining and strengthening customer relationships with enterprise clients across India.
- Ensuring network uptime, scalability, and security with proactive monitoring and troubleshooting.
- Preparing BOQs, deployment reports, and documentation for client projects.
- Supervising implementation of security protocols, RADIUS integration, and ISMS compliance.
- Driving escalations and ensuring SLA adherence for high-priority customer sites.

Role: Senior Network Engineer Feb-2024 to March-2025

Responsibilities:

- Maintaining LAN, WLAN and architecture of the server as per the business policy.
- Analyze and implement new security protocols for greater efficiency against any threat or malfunctions.
- Implement a virus detection system beforehand for sound safety.
- Resolving the existing security issue including hardware malfunctions.
- Generating and maintaining the virtual private network, firewalls, web protocols and email security decorum.
- Reporting the security analysis of findings.
- Maintaining the regulatory systems about ISMS policy (Information System Management Systems).
- Investigations of Security breach alert.
- Developing the security authentication protocol.
- Maintaining server and switches.
- Maintaining & implementation of the SOP for Network security.
- Supervising the installation of new software's and hardware's.
- Recommend modifications in legal, technical and regulatory areas that affect IT security.
- Knowledge of performing routing protocols (MPLS, HAIPE/IP, QOS and WAN).
- Monitoring of web security gateways, perimeter security, network access controls, endpoint security.

ZOLOSTAYS

Role: **Network Engineer**

Responsibilities:

- Responsible for complete life cycle of the network system.
- Ensure all the network share up and running and reduce the down time.
- IP address auditing.
- Creating strategies to improve the efficiency of the network plan and implement network infrastructure in new properties.
- Keeping track of the service providers over all accounts and payment related issue.
- Deployed Managed WIFI setup in 20+ Properties in Bangalore and Hyderabad.
- Optimized reliability, performance, supportability and security of Zolo infrastructure.
- Worked Creating LAN network with Access point (Ubiquiti Unifi. Cambium, Tplink Zyxel, etc.).
- Planned and implemented automated backups and fail- over configurations.
- Working on regular escalations and coordinating with the team to solve various kinds of network problems.
- Setup computers and install software for various applications and programs.
- Installation, Up gradation, Configuration and Troubleshooting of windows & Ubuntu.

Team Lead

- Handle daily technical support activities on desktop support, data network and server management.
- Establishes networking environment by designing system configuration and directing system installation.
- Defines, documents, and enforces system standards.
- Collaborating with network architects on network optimization.
- Securing network system by establishing and enforcing policies and defining and monitoring access.

ACT Fibernet

Role: **Network Engineer**

Responsibilities:

- Coordinating with vendors and field teams to ensure timely resolution of network issues.
- Handling **fibre-related issues rectification** including splicing, cuts, and service restorations.
- Maintaining and supporting **senior elements area-wise** to ensure network stability and uptime.
- Managing and monitoring **140+ network clusters**, ensuring smooth service delivery and SLA compliance.
- Troubleshooting router configurations, crimping issues, and customer escalations.
- Ensuring efficient operations by reducing downtime and proactively resolving service-affecting faults.
